# SPAN LIQUID FILLED PRESSURE GAUGES

There certainly are a lot of gauges to choose from these days. Many are imported. Most have the same stainless crimped ring throw away construction. But there is one gauge that is **American Made** and totally different in construction and appearance. This catalog features that gauge - The **ORIGINAL SPAN LIQUID FILLED PRESSURE GAUGE SERIES**.

## ONLY SPAN GAUGES OFFER THESE UNIQUE FEATURES

- **ZYTEL NYLON CASE:** Tough, corrosion resistant, impact resistant, Zytel Nylon case. Over 10,000 lb. tensile strength. Removable bezel design allows repair or recalibration.
- **ALL SIZES MATCH:** All SPAN 2-1/2", 3-1/2" and 4-1/2" stem and panel mount cases are uniform and match in appearance.
- **"NO BUBBLE":** The internal "breathing diaphragm" eliminates the need for an air bubble in the mid-range of the gauge, which can distort readings and looks unsightly. The ICD is standard on some 2-1/2" and all 3-1/2" and 4-1/2" models. (Available as an option when not standard.)
- **TEMPERATURE COMPENSATED:** The ICD compensates the case (to 150°F) for changes in internal case pressure caused by fluctuations in ambient temperature. (Especially important in lower pressure and vacuum gauges.)
- **LARGER DIAL:** Because the American Made SPAN is built to ANSI/ASME B40 Standards, our dial is 2-1/2". (Our imported competition measures the case, not the dial.) See the difference for yourself. This is the easiest reading 2-1/2" gauge on the market.
- **FREEZE PROOF:** The KEM-X Socket Saver is an internal diaphragm seal to prevent freezing, clogging and corrosion. It is available on all SPAN gauges. (See Page 6 of Catalog.)
- **NON-YELLOWING GLYCERIN FILL:** Standard fill: non-yellowing, crystal clear glycerin (interlube) for temperatures -40° to 150°F. For ranges below 30 PSI used below -10°F, specify 70-30 glycerin.
- **SPECIALS:** Custom dials, logos, removable stainless steel bezels and specially manufactured instrumentation are available. Because we control the manufacturing, we can offer special options with lower quantity requirements and make a gauge exactly as you want it for your application.

## Liquid Filled Industrial Gauges

### Overview

SPAN gauges are designed for rugged service applications where brass & copper materials are compatible with the media being used. Liquid fill fluid dampens the gauge pointer movement for improved readings and longer life, making SPAN gauges ideal for high shock and vibration applications.

Our Zytel case and ring offer good appearance and excellent resistance to chemical, weather, and corrosion attack.

The SPAN gauge has many optional features that allow a user to develop a basic or special product specification.

### Benefits

- “No bubble”: The internal “breathing diaphragm” eliminates the need for an air bubble in the mid-range of the gauge, which can distort readings and looks unsightly. The ICD is standard on 2.5” dials up to 60 PSI, optional on higher ranges and standard on all 3.5” and 4.5” dials.
- Temperature compensated: The ICD compensates the case (to 150° F) for changes in internal case pressure caused by fluctuations in ambient temperature. (Especially critical in lower pressure and vacuum gauges.)
- Freeze proof: The KEM-X Socket Saver is an internal diaphragm seal to prevent freezing, clogging, and corrosion. It is available on all SPAN gauges.
- Lighted Dial: SPAN offers the only lighted and liquid filled gauge. 12 volt incandescent or LED in white, blue, green or red.

### Applications

- Fire Apparatus
- Irrigation / Water purification
- Bulk Transport Trailers
- Waste Water / Slurry
- Military / Marine

## Fully-Filled Case with Temperature Compensation

The internal "breathing diaphragm" eliminates the need for an air bubble in the mid-range of the gauge, which can distort readings and looks unsightly.

The "ICD" is standard on all 2-1/2" low pressure gauges (optional above 60 PSI), and standard on all ranges of 3-1/2" and 4-1/2" FA-Series gauges.

The "ICD" also prevents accuracy shift from changes in internal case pressure caused by fluctuations in ambient temperatures from -20 to 150° F.

## KEM-X Socket Saver

### FREEZE PROOF PROTECTION (STANDARD)

Keep mud, water and slurry from entering the Bourdon tube of your gauge with our exclusive, patented "Kem-X Socket Saver". Once the tube of the gauge has been evacuated and filled with instrument oil, a special BUNA-N 'boot' is inserted directly in the socket of the gauge and held in place by a retaining ferrule. This combination isolates any water from the wetted parts of the instrument. Our Kem-X prevents freezing from harming your gauge.

### FEATURES

- Isolates corrosive media
- Eliminates freezing problems
- Prevents gauge clogging
- Eliminates heavy metal external isolators, which are cumbersome and expensive

### APPLICATIONS

- Agricultural Spray Equipment
- Chemical Plants
- Refineries
- Water Treatment Plants
- Power Plants
- Salt Water Service

## Shock Resistant Dry Pressure Gauges

For applications where a liquid filled gauge is not desired, **SPAN** has developed its new Dash-Pot shock and vibration resistant movement. The 'DPM' option is now available on all **SPAN** 2.5", 3.5" and 4.5" gauges in all mounting styles.

This German-made precision movement offers the shock and vibration resistance of a liquid filled gauge with the convenience and cost of a dry construction.

## Liquid Filled Series SC Gauges 2.0", 2.5" and 4.0"

### Overview

Series SC gauges offer a stainless steel case with brass or corrosion resistant 316 stainless steel internals. Gauges are available in sealed dry, liquid filled for high shock and vibration applications.

SC gauges are suitable for applications with media compatible with brass or 316 stainless steel wetted materials

### Benefits

- Matching sealed stainless steel cases are offered in three sizes in plain or two panel mounting configurations. An optional removable bayonet ring is available
- Case dimensions are popular metric sizes. Panel mounting gauges fit existing panels using most stainless steel cased gauges
- Made in the USA, series SC gauges offer a very competitive high quality option to many imported gauges

### Applications

- Intended for adverse service conditions where pulsating or vibration exists (with liquid filling)
- Hydraulics and compressors
- Suitable for gaseous or liquid media that will not obstruct the pressure system
- Applications compatible with 316 stainless steel internals (SC-2) or brass internals (SC-1)

## Dry Steel Cased Pressure Gauge 1.5", 2.0", 2.5" and 3.5"

### Overview

These gauges are designed for use with gas, oil and water or any media not corrosive to brass or bronze. Series EC gauges are designed for applications not requiring a liquid filled gauge. EC gauges are a good choice in applications not subject to high shock or severe vibrations.

### Benefits

- Dry black steel case gauge with chrome rings
- Large inventory in stock for quick shipment
- Back-up stocking programs available to OEMs
- Quality manufactured in ISO 9000 certified facility

### Applications

- Pneumatic regulators
- Filters
- Low cost panel mounted gauges
- Small diameter gauges
- Tank pressures
- Air pressure measurements

## Series 4200 Pressure Transducers

### Overview

The **AST OEM Pressure Sensor** can be constructed as an amplified voltage output pressure transducer or 4-20mA loop powered pressure transmitter. The 4200 covers a wide variety of applications that require rugged construction, high cycle life, as well as media compatibility to deliver outstanding and long-term performance.

**Krystal Bond™ Technology** is the foundation of the 4200. This leading **MEMS** technology gives the flexibility to be used in virtually any OEM application. Whether measuring hydraulic pressure in a manifold or corrosive media such as sea water or hydrogen, the 4200 pressure sensor provides a thick diaphragm to maintain long-term stability and use.

### Benefits

- High Strength Stainless Steel Construction and UL/cUL 508 Approved
- No Oil, Welds or Internal O-rings
- Wide Operating Temperature Range and ranges up to 10,000 PSI
- Low Static and Thermal Errors and EMI/RFI Protection
- Unparalleled Price and Performance
- Compatible with Wide Range of Liquids and Gases
- Simple Installation for Panel Builders

### Applications

- Control Panels
- Industrial OEM Equipment
- Hydraulic Systems
- HVAC/R Equipment
- Data Loggers
- Pneumatics

### Performance @ 25°C (77°F)

Accuracy*	< ±0.5% BFS
Stability (1 year)	±0.25% FS, typical
Over range Protection	2X Rated Pressure
Burst Pressure	5X or 20,000 PSI (whichever is less)
Pressure Cycles	> 100 Million
* Accuracy includes non-linearity, hysteresis & non-repeatability

# SPAN<sup>TM</sup> Sub Sea Pressure Gauges

Born in the 'Oil Patch' in 1970, the **SPAN** liquid filled pressure gauge was the standard for offshore platform, ROV, panel makers and oil patch support equipment.

The **ORIGINAL** is still the **BEST!**

**Case & Bezel:** Zytel Nylon for Maximum Corrosion Resistance

**Size:** Matching 2-1/2", 3-1/2" and 4-1/2" Dial Sizes

**Socket & Tube:** Brass or Stainless Steel

**Fill:** SPL Glycerin for hostile environments. Fully filled with no bubble

**Accuracy:** 1% Full Scale ANSI Grade 1A

**Connection:** 1/4" NPT Bottom or Back. (1/2" NPT Optional)

**Ranges:** VAC thru 15,000 PSI. Custom Dials Available

**Styles:** Stem and Panel Mounted

'ICD' patented internal breathing diaphragm offers TOTAL liquid fill with no expansion bubble. Excellent in angled panel mounting applications. **ESSENTIAL** in any sub-sea or ROV deep water application.

NIST certified gauges available as option.

SPAN Sub Sea Gauges are made to order and have special construction for this application. Contact factory for specifications and ordering information.

## OTHER PRODUCTS AVAILABLE

- **THERMOMETERS:** Bi-metal and remote reading dial thermometers and digital remote readouts. All sizes. OEM priced.
- **PROCESS GAUGES:** A full line of 'DRY' industrial and process gauges in brass and stainless steel construction are available in 4.5", 6" and 8.5" sizes in our Duro-United product line.
- **GAUGE REPAIR AND CERTIFICATION:** Gauges can be calibrated to N.I.S.T. standards with certificate. Gauge repair and Oxygen Cleaning services are also available.
- **CUSTOM TEST GAUGE KITS:** Gauges in carry cases for hydraulics, aviation, etc. are available to your specifications.

## A BIT OF SPAN HISTORY

Established in 1969, **SPAN's** founder Leo Whitson began making the first American made liquid filled gauges in Plano, Texas for the "Oil Patch" industry. SPAN Instruments also pioneered the use of liquid filled pressure gauges in the fire truck industry in the 1980's. The SPAN gauge became the "standard" of the industry and was used by most fire manufacturers through-out the country.

**SPAN** shifted its focus in the 90's to new fields such as the growing electronic and semi-conductor marketplace. In 1998 the Thuemling Instrument Group, Inc. purchased the industrial pressure gauge portion of SPAN Instruments. The Thuemling family has been associated with **SPAN** since 1971 and had over 40 years experience in the OEM pressure and temperature gauge field. From their new facility in Waukesha, Wisconsin, over the last 13 years, Thuemling has supplied over 1 Million new generation **SPAN** gauges in the harshest environments such as construction equipment, shipbuilding, mining and process industries as well as numerous equipment manufacturers through-out North America.

Our company is built on a wealth of experience in product and application knowledge. We strive to be a resource to our customers when designing new applications or problem solving their existing ones.

An American-Made Gauge. Owned and operated by a 4th generation family company. Located in the Heart of the Midwest . . .
